

# Technology in the Art Room

Digital Imagery using  
The Adobe Creative Suite  
Applications  
Photoshop, Illustrator, and  
InDesign

# Photoshop

The exciting new way to photograph and digitally enhance an image!

**encourage  
the students  
in new  
directions**

shoot from  
new angles

Interesting  
compositions

# Take flight with their ideas!

a unique perspective

# different points of view

# Looking for composition in positive and negative spaces

with textures and patterns

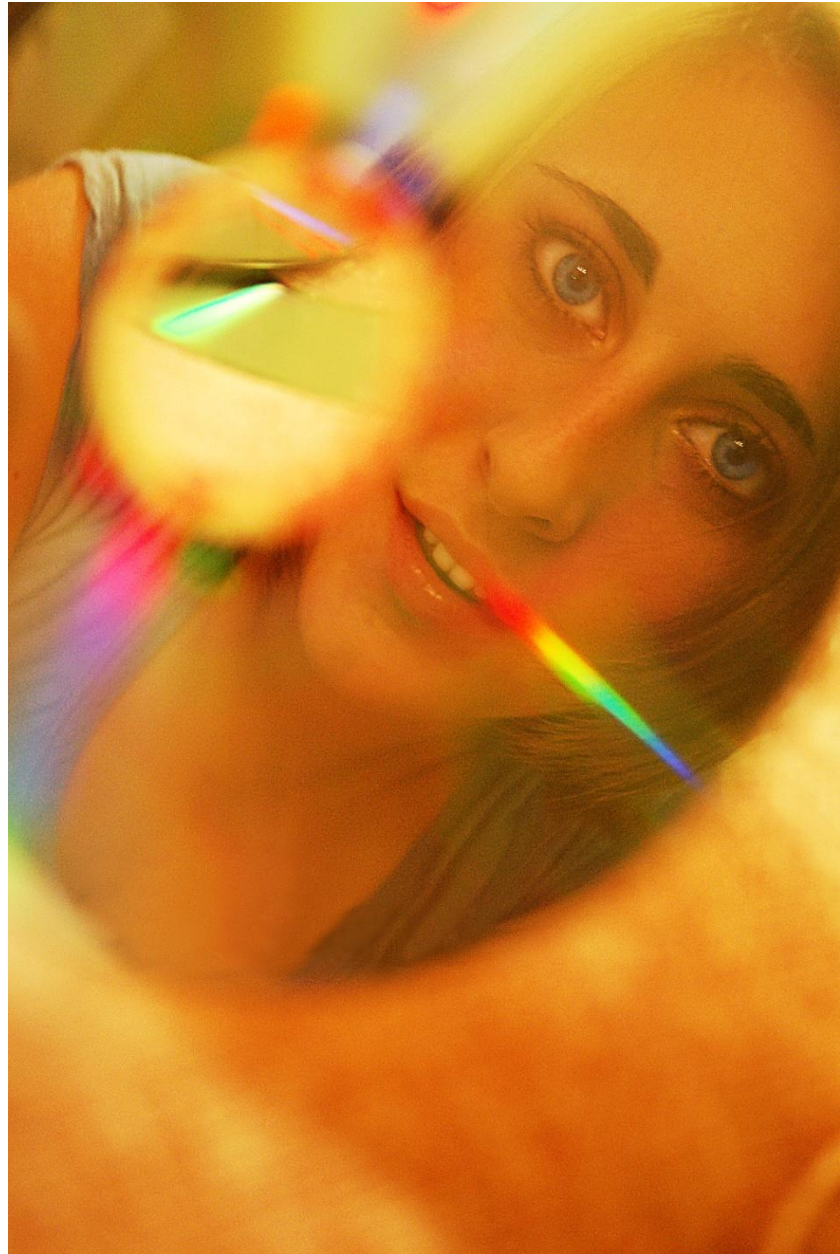

*working on the cutting edge*

reflections  
reflections

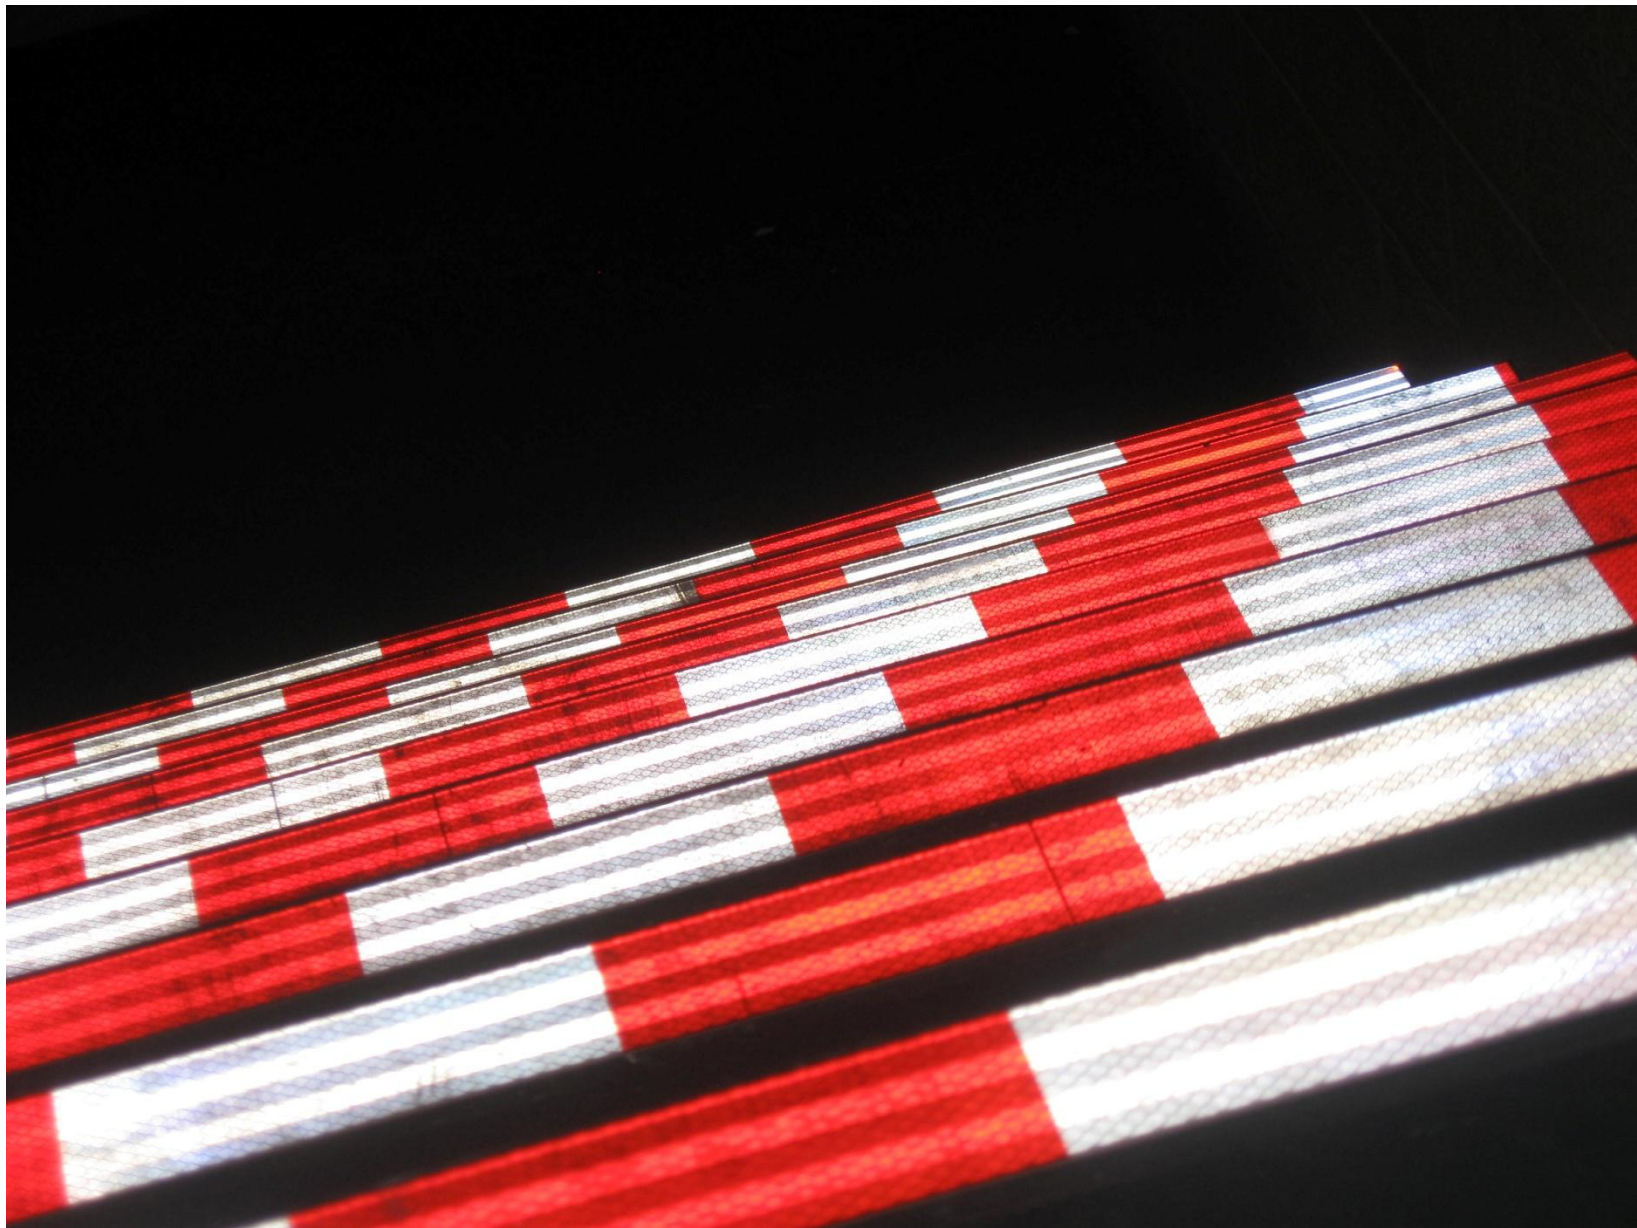

Through the eye of new digital cameras you can claim extreme clarity and vivid color.

brightness added  
with enhancement  
and saturation

# capture action

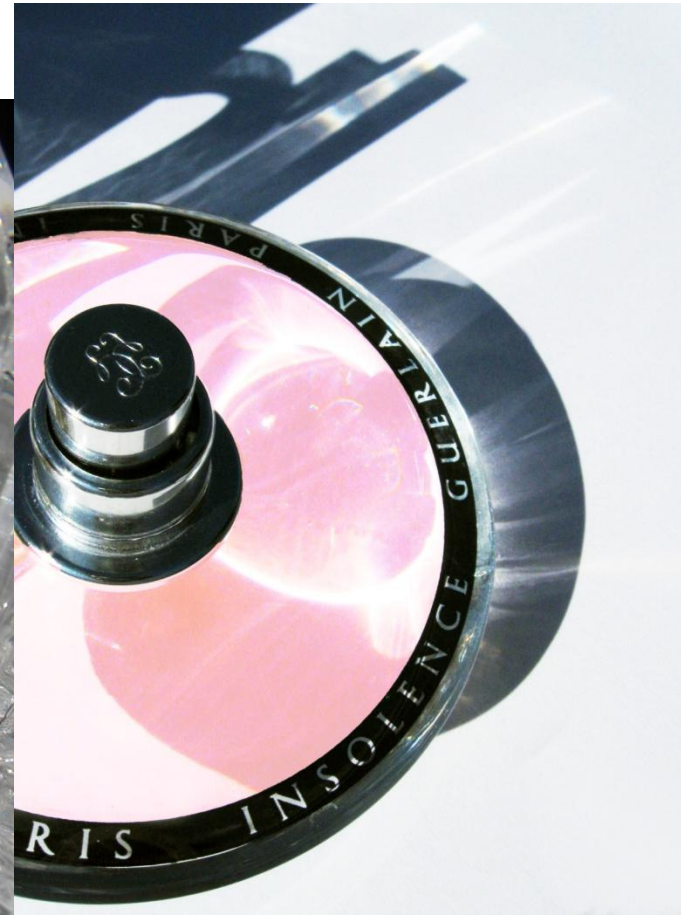

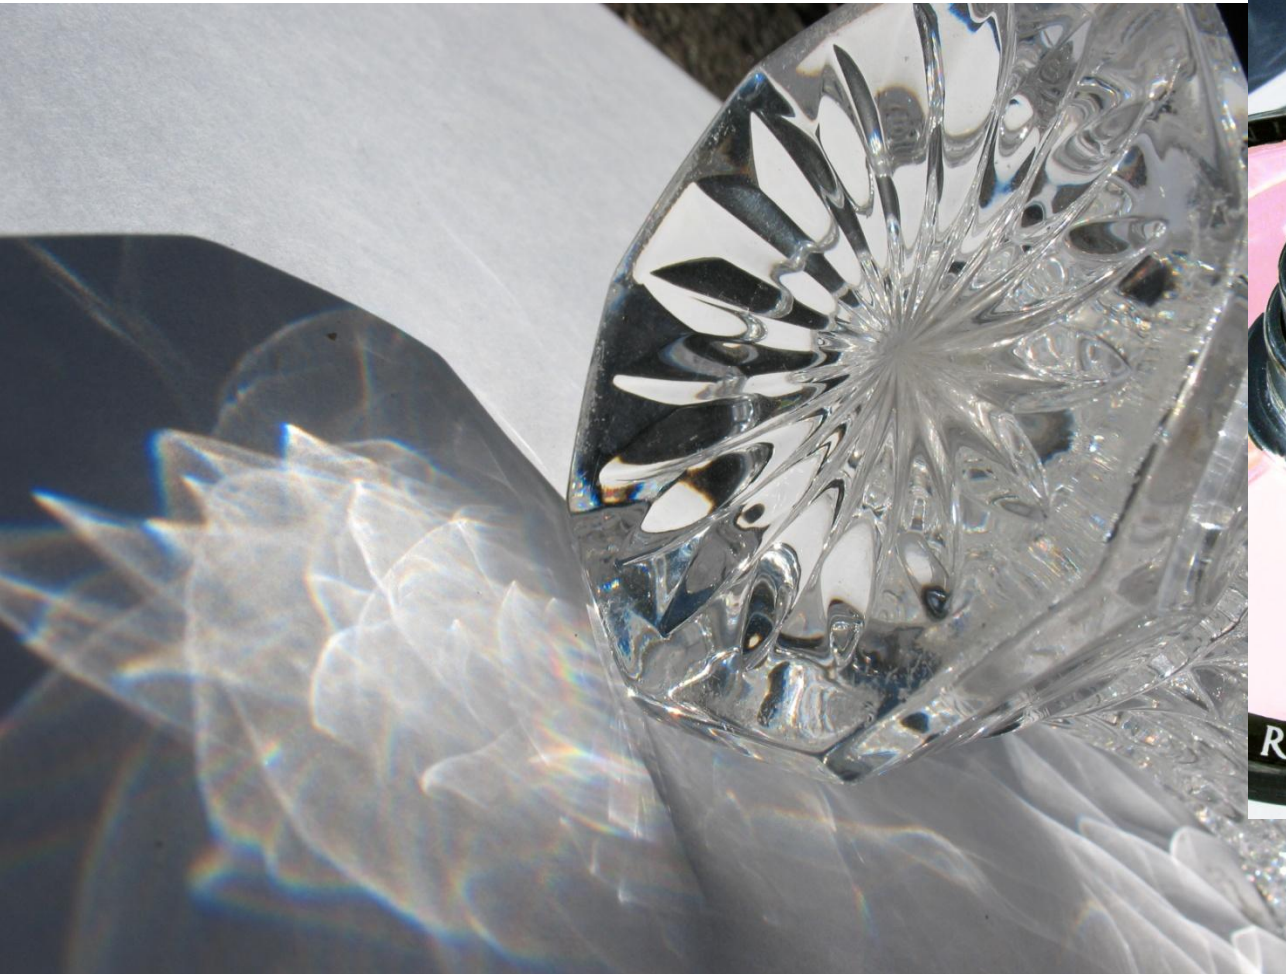

*pan motion*

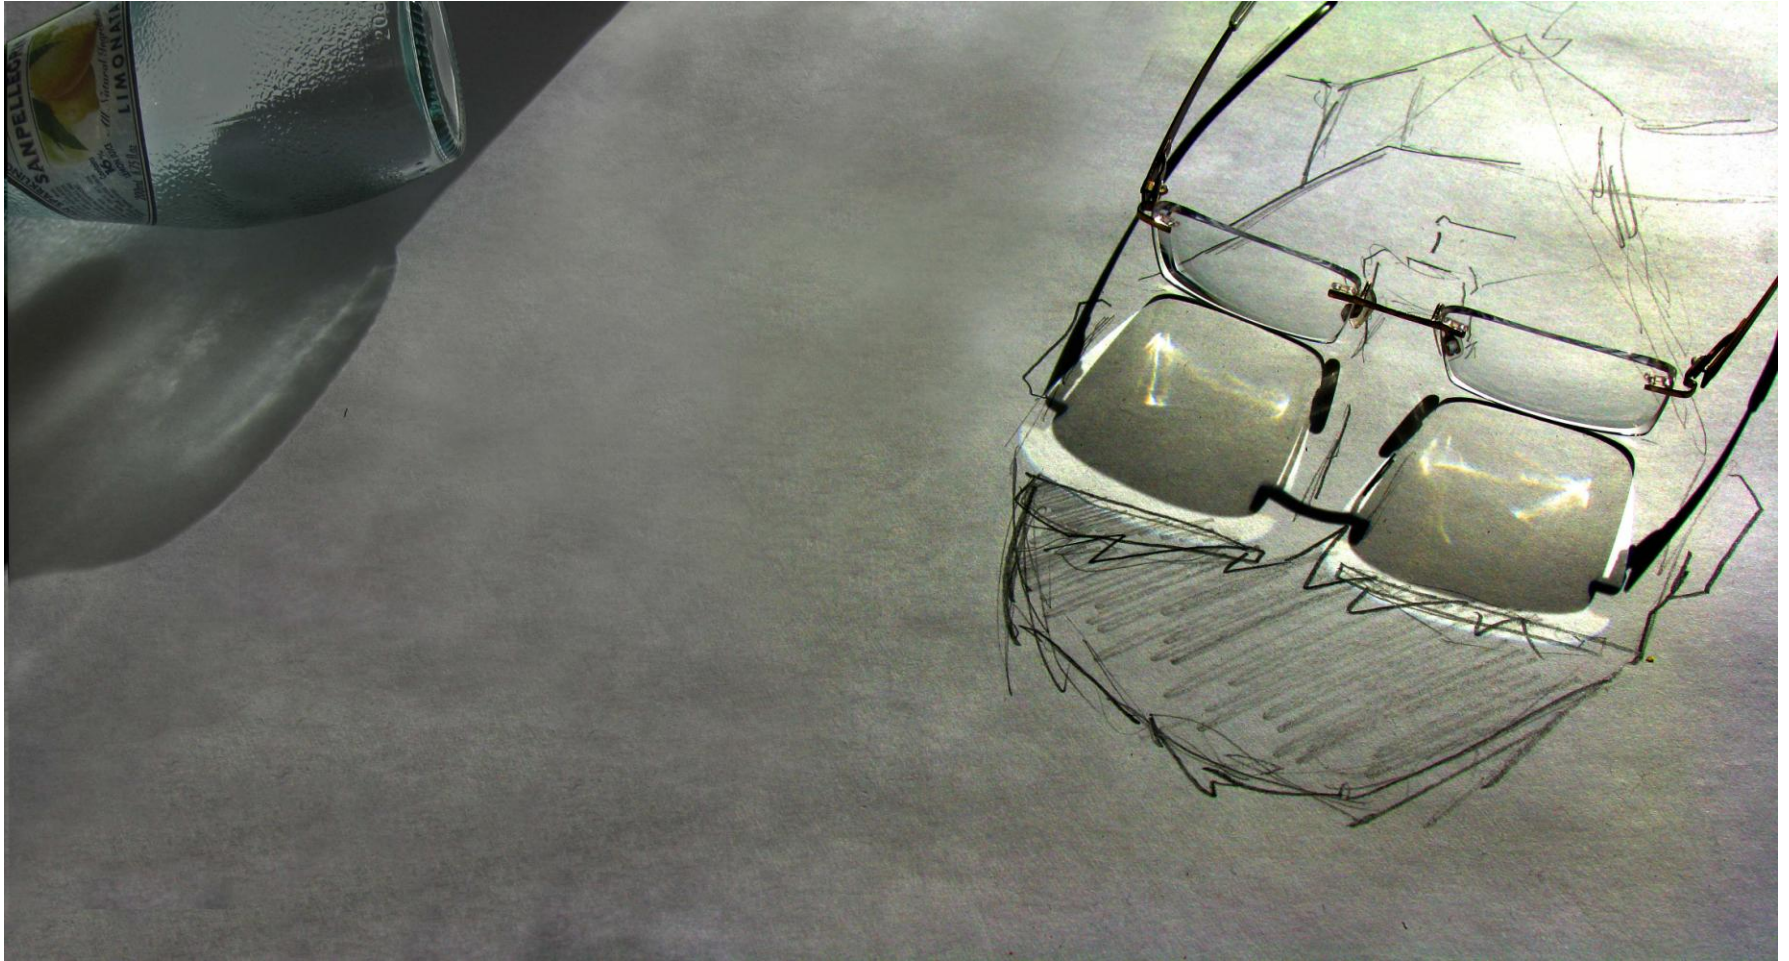

# The sparkle of glass

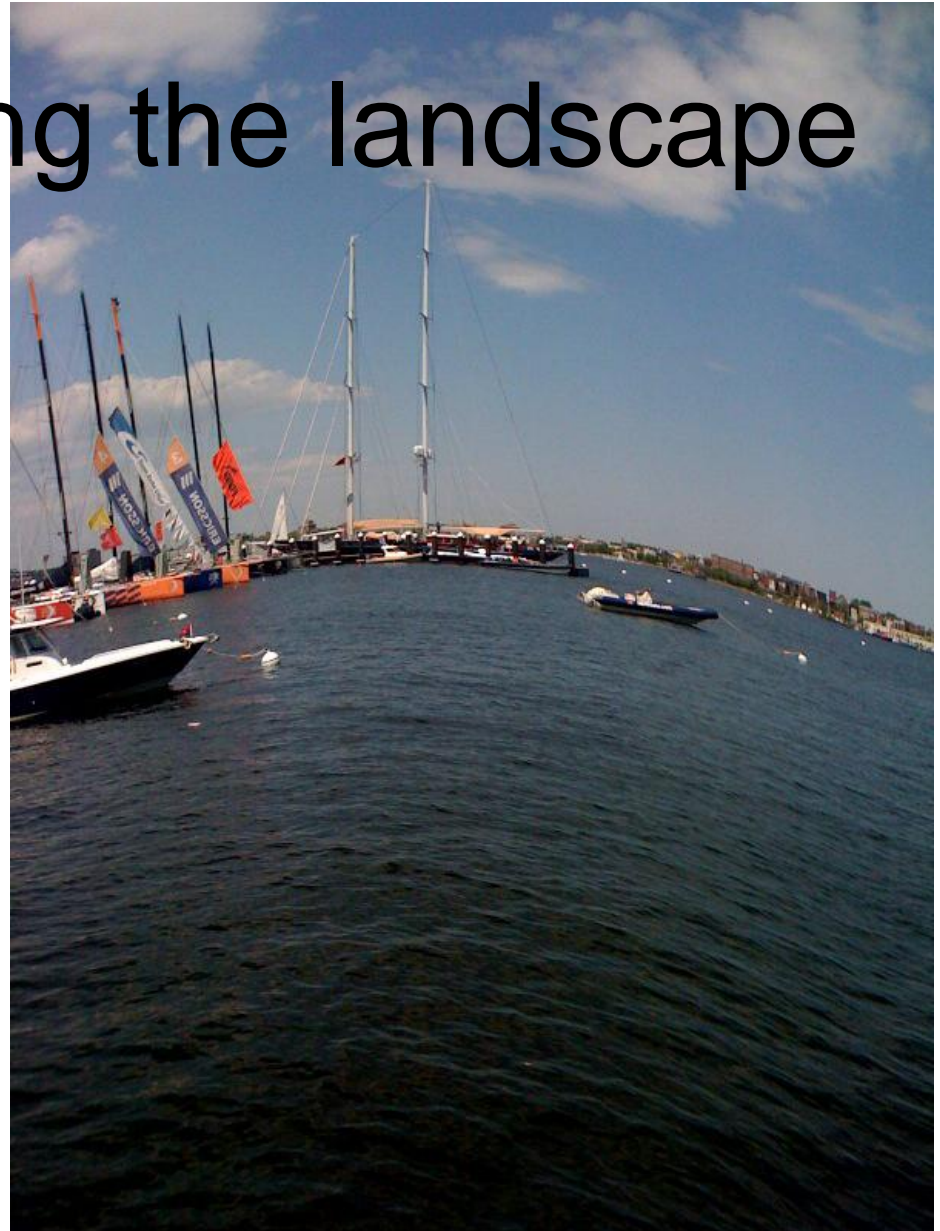

Looking through  
the lens  
with fresh  
ideas

# exaggerating the landscape

with  
a fish eye  
lens

fragment a scene

David Hockney style

paint with light

experiment

LIZZIE 2

multiple images !

layering your  
pictures

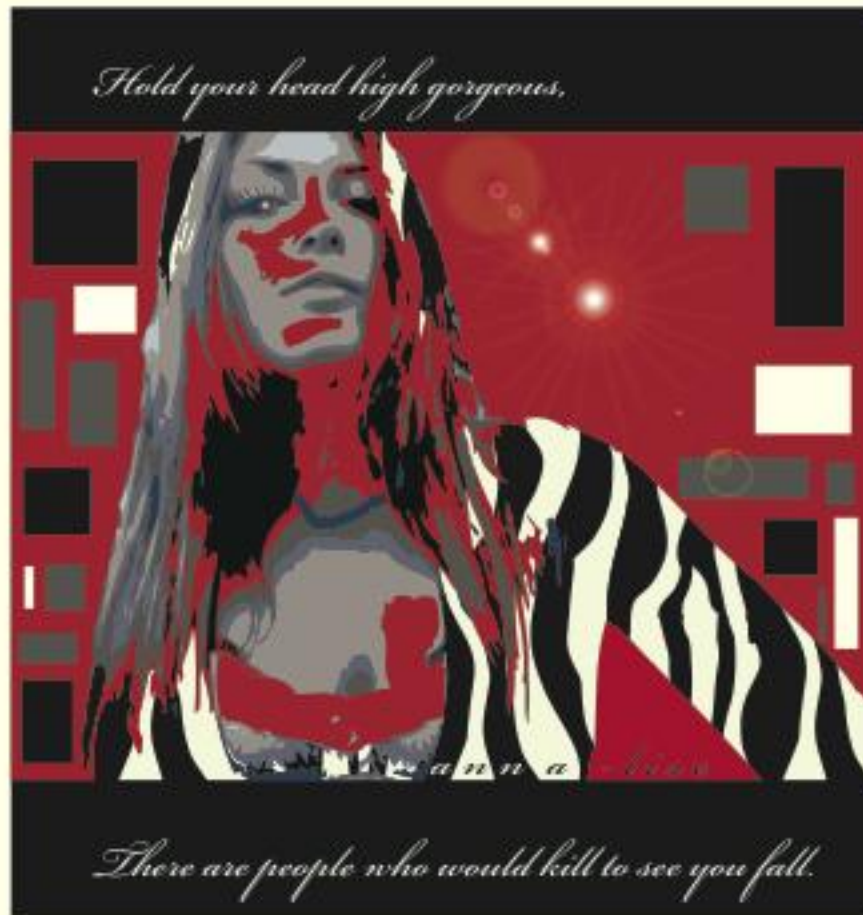

multiple exposures

using the tools  
of photoshop:  
cut, paste,  
move, warp  
and opacity

# ILUSTRATOR

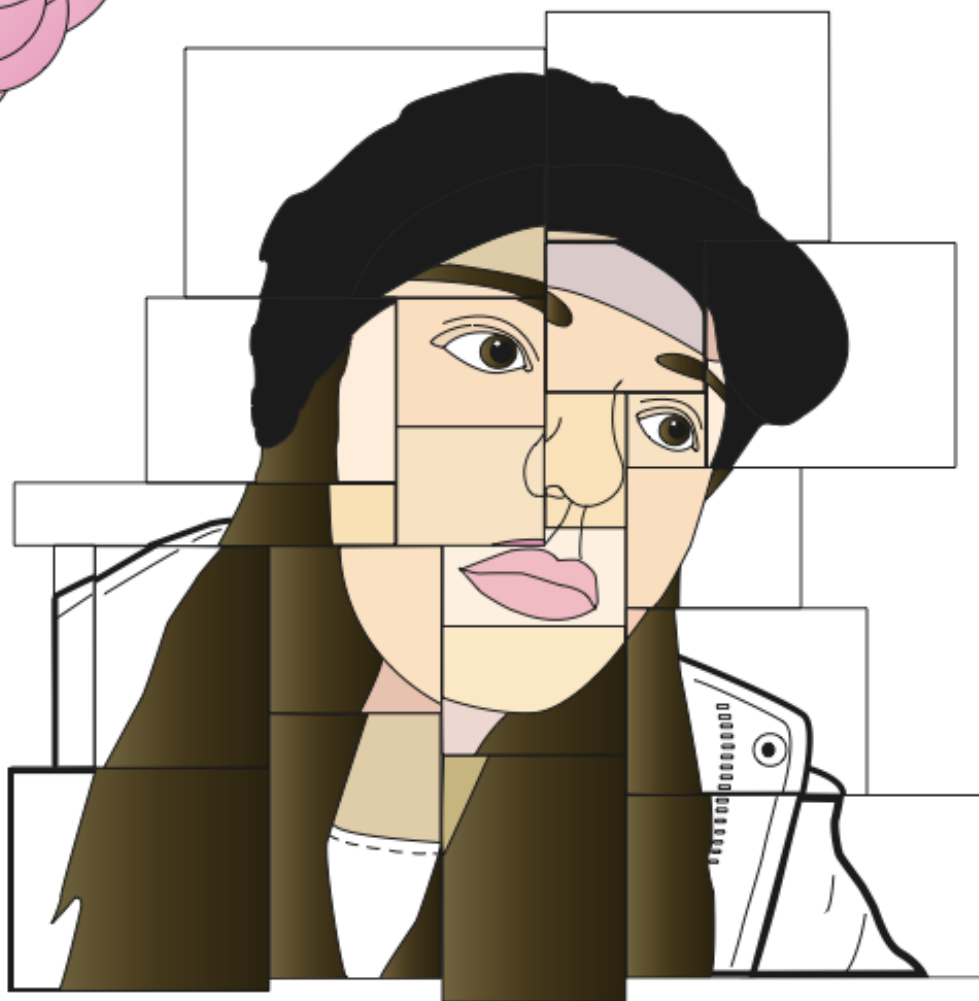

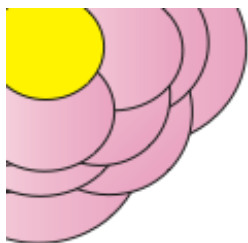

a professional artist' tool

# designs for portraits

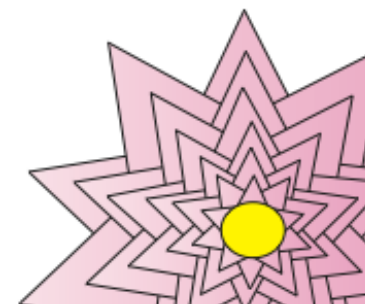

*"I don't love you I'm  
Just passing the time,  
You could love me if  
I knew how to lie,  
But who could love me  
I am out of my mind,  
Throwing a line out  
To sea, to see if I can  
Catch a dream..."*

*- Kelsey Wright*

If what they say is true  
You are a shadow  
in the fourth dimension  
To float away with you  
We see the corners where  
nothing happens  
While we drifted we were on  
Ceilings lifted  
walls were gone  
You speak the language  
of the breeze  
All your leaves  
were meant for me  
The love that every person  
wants to be

Technology in our classroom  
pushes our student artist  
into the professional realm!  
Gives them a possible  
career choice doing  
something they love!
